

Data sheet WI 95TU

High efficiency water-to-water heat pump for indoor installation.

Installation location:

Max. flow temperature: 62 °C

Casing colour: White (similar to RAL 9003)

Heat pump for heating purposes with two performance levels for increased efficiency in partial load operation for indoor installation and integrated heat pump manager WPM Econ5Plus with standard display. Variable connection options for the water and heating connections on the rear wall of the casing. A sound-optimised metal casing and the integrated solid-borne sound insulation with free-swinging compressor base plate make direct connection with the heating system possible. Access for service work front and left, no minimum clearance is required on the right side. High coefficient of performance through electronic expansion valve, COP booster and electronic pump control depending on the temperature spread in the heat generator circuit. Sensor monitoring of the refrigeration circuit for a high degree of operational safety and integrated thermal energy metering (display of the calculated quantity of thermal energy for heating, domestic hot water and swimming pool water preparation). FWO function for more efficient domestic hot water preparation with increased domestic hot water temperatures and volumes of water to be drawn through optimised tank charging.

Universal design with two compressors for output regulation when operating at partial load, optional domestic hot water preparation and flexible expansion options for:

- Bivalent or bivalent-renewable operating mode
- Distribution systems with unmixed and mixed heating circuits
- Use of load-variable tariffs (SG Ready)

Soft starter, flow and return sensors for the water and heating circuit integrated. External sensor (standard NTC-2) and circulating pump for the heat generator circuit in the scope of supply (note free compression). Heat pump white textured (similar to RAL 9003). Heat generator circuit pump 12 m delivery height at 6 m³/h, flange connection DN 40, installation length 250 mm.

Technical data

Dimplex High efficiency water-to-water heat pump for indoor installation. (Medium temperature)

Heat pump code	3011
Max. flow temperature	62 Grad
Lower operating limit heat source (heating operation) / Upper operating limit heat source (heating operation)	7 Grad / 25 Grad
Sound power level	62 dB(A)
Refrigerant / Amount of refrigerant	R410A / 23,0 kg
Max. heating water flow rate / Pressure drop	17 m3 pro h / 27100 Pa
Heat source flow (min.)	18,9 m3 pro h
Width x Height x Depth **	1350 x 1900 x 805 mm
Weight	565 kg
Rated voltage	3/PE ~400 V, 50 Hz
Starting current	62 A
Fuse protection HP with separate infeed ***	C 50 A
Heat pump seal of approval (valid until)	Yes / 23.11.2022

*Delivery time on request.

**Please note that additional space is required for pipe connections, operation and maintenance.

* Other specific accessories available / required

Important information:

The combination of the components and the quantities indicated represent a non-binding sample system, which needs to be tested and individually adapted as required. Pump dimensioning must be reviewed according to the pressure loss of the system and the minimum heating water flow rate of the heat pump.
