

Data sheet SIW 6TES

Compact brine-to-water heat pump for indoor installation incl. domestic hot water preparation.

Max. flow temperature: 62 °C

Casing colour: White (similar to RAL 9003)

Heat pump for heating purposes for indoor installation with 170 litre domestic hot water cylinder and integrated heat pump manager WPM Econ5 with touch display. Variable connection options for brine and heating connections on the back board of the casing. Sound-optimised through encapsulated compressor housing and free-swinging compressor baseplate. Removable heat pump module for easy integration of the heat pump in the building. High coefficients of performance (COP) thanks to electronic regulation of the volume flows and optimised heat transfer due to asymmetrical heat exchanger. Compact design with domestic hot water preparation and integrated components for direct connection of an unmixed heating circuit (must not be used for bivalent systems):

- Built-in pipe heater (2 / 4 / 6 kW) can be used for reheating domestic hot water up to 60 °C and as a stand-by for heating operation
- High-efficiency heat circulating pump (note the free compression)
- domestic hot water circulating pump
- Overflow valve for adjusting the volume flow in the heating circuit
- Use of load-variable tariffs (SG Ready)

Integrated thermal energy meter for heating/domestic hot water Electronically regulated brine circulating pump (observe the free compression) and thermal energy metering for heating/domestic hot water preparation. Soft starter (from SIW 8), integrated flow and return sensor; external sensor (standard NTC-2) and dirt trap for brine circuit included in the scope of supply. Heat pump white textured (similar to RAL 9003). Brine circuit manifold must be ordered separately. Expansion vessel and safety module for the brine circuit and heating circuit must be ordered separately.

SIW 6TES

Technical data

Dimplex Compact brine-to-water heat pump for indoor installation incl. domestic hot water preparation. (Medium temperature)

Heat pump code	4027
Max. flow temperature	62 Grad
Lower operating limit heat source (heating operation) / Upper operating limit heat source (heating operation)	-5 Grad / 25 Grad
Sound power level	42 dB(A)
Refrigerant / Amount of refrigerant	R410A / 1,2 kg
Max. heating water flow rate / Pressure drop	1,0 m3 pro h / 5500 Pa
Heat source flow (min.)	1,3 m3 pro h
Width x Height x Depth **	590 x 2000 x 734 mm
Weight	265 kg
Rated voltage	3/N/PE ~400 V, 50 Hz
Starting current	28 A
Fuse protection HP with separate infeed ***	C10A
Heat pump seal of approval (valid until)	Yes / 18.03.2024

*Heat output and coefficient of performance (COP) according to EN 14511

**Please note that additional space is required for pipe connections, operation and maintenance.

* Other specific accessories available / required

Important information:

The combination of the components and the quantities indicated represent a non-binding sample system, which needs to be tested and individually adapted as required. Pump dimensioning must be reviewed according to the pressure loss of the system and the minimum heating water flow rate of the heat pump.
